

[widgetkit id=11]

We are an independent and one of the longest established electrode manufacturer in Indonesia.

Technological advances incorporating new alloys and designs require new welding solutions. To be able to meet this challenge head-on, our company maintains a vigorous "Product Development Programme" that is necessary to keep up with the ever changing demand in the market place.

PT Alam Lestari Unggul was certified ISO 9001 Quality Management System by Lloyd's Register Quality Assurance in 1996 and now upgraded to ISO 9001:2015. To give further assurance of our product quality to customers, we also hold product approvals from the following product certification bodies: Lloyd's Register (LR), American Bureau of Shipping (ABS), Nippon Kaiji Kyokai (NK), Biro Klasifikasi Indonesia (BKI).
